What Our Clients Are Saying About TANKNET®...

"We are very, very happy with how TANKNET® worked for us this year. Having so much more control over fermentation temperatures certainly had a positive impact on wine quality."

— Linda Trotta, Director of Winemaking, Gundlach Bundschu Winery

"With TANKNET®, each member of our winemaking team is able to customize and view up-to-the-minute fermentation data easily from anywhere in the winery. We now make more informed decisions, faster and with much greater confidence than ever before. And because the TANKNET® web interface is so intuitive, productivity began on day one. Korbel couldn't be more pleased with its selection of TANKNET® over the five competing systems that we evaluated. With its superior technology and virtually unlimited expansion capabilities we are sure that TANKNET® will serve our needs for many years to come!"

— Randall Meyer, Winemaker, Korbel

"Having replaced RTI controls with TANKNET® years earlier at Acacia, when I inherited a Logix system at Hanzell, the advantages that TANKNET® had provided me were immediately obvious. The intuitive interface at the tank controller, brix entry in the cellar, web-browser access from anywhere, plus realistic cellar maps and insightful data graphs together make TANKNET® the best fermentation control system I've ever used. That's why Hanzell wasted no time replacing Logix with TANKNET®."

— Michael Terrien, Winemaker, Hanzell Vineyards
